Freedom for All or None?

Shockingly, Nancy Pelosi has said something with which I actually agree. During a [recent press conference](#), when speaking about vaccinations for members of Congress, Pelosi actually said, “If we could, but we can’t require vaccinations for the members, much less the American people.” Clearly, if you watch the video, she is a little miffed that members of Congress and American citizens have a right to get vaccinated or not. She is complaining that she can’t take her mask off because the Capital Physician won’t let vaccinated folks remove their masks, apparently because only about 75% of the members have been vaccinated.

We have arrived at a point in this COVID debacle the tyrants have dreaded. The vaccination of the populace has slowed to a trickle as those who wish to be vaccinated are fewer and fewer, and a good percentage of people who got their first shot are opting not to get the second. Federal and state governments understand they cannot require vaccinations, nor can they implement vaccine passport programs unless they want to risk them being overturned in the courts. So, as I’ve mentioned before, they are relying on their big business lackey’s to do it for them. They need big business to institute vaccine passports in order to coerce the populace into getting their shots by discriminating against free citizens who prefer not to get the shot(s).

My employer, an entity of the State of Florida, has found itself in the same sort of predicament. They are dying to give perks (i.e. allow more formerly normal activities), to those who get vaccinated, but Governor Ron DeSantis issued an executive order banning vaccine passports. Giving one group of citizens more privileges than another is discriminatory and represents a de facto vaccine passport system. My employer will likely find they will have to either free everyone or continue the injustice for all. If you want to wear a mask or get the shot(s) that’s fine with me, but there should be no mask or vaccination mandates. Time to free the people... shots or no shots!

Taking Back America by Taking Back the Republican Party

It is essential for those of us who believe in an America First, small government, and big freedom oriented agenda to get involved at the local level in order to take back our country. The 2022 elections will be the linchpin as to whether the U.S. goes the way of Venezuela or not. **We the People** must wrest control of the House and Senate from the lunatic left, and in order to do that we must remove all RINOS, starting at the local level. By the middle of May, I will have been sworn in as a Precinct Committeeman (PC) of the Hillsborough County Republican Party, and I have joined other "grass-roots" organizations in order to help get pro-American candidates elected and pro-American policies be implemented. Ground up is the only way we can fight back against the D.C. Swamp Critters. We can have the most effects locally, which will percolate up to the Federal level.

I got the idea from listening to [Dan Schultz](#) on [Steve Bannon's War Room Pandemic](#). It is not a difficult process, and it is an excellent way to outnumber the RINOS and take control of the Republican Party. For years, the Republican Party has been made up of go-along-to-get-along individuals more concerned with keeping the status quo, than putting forth candidates who have the American peoples' backs. It has been a little social club/coffee clutch, keeping secret the fact that more than half of their PC positions were unfilled. Due to Dan Schultz's and Steve Bannon's efforts, I'm sure a big chunk of those vacancies have already been filled. Do not snooze on this opportunity! Check out the information from Dan and Steve, contact your local county Republican Party, and get involved. While you're at it, bring all your patriotic friends to the party!

Second Amendment Under Attack, So What Else is New?

As promised, Der Fuhrer Biden and his many accomplices are working diligently to disarm law-abiding citizens at every turn. His anti-2A appointments for Attorney General and the "AFT," as Biden called it, are busy working on new regulations to ban pistol braces, so called "assault weapons," and require universal background checks, even for those ultra-scary "ghost guns." It doesn't look good for gun owners at the moment on the Federal level, but some states are stepping up with laws of their own to prevent the enforcement of unconstitutional Federal laws in their states. It will be interesting to see how that pans out. It's funny how the states are just now objecting to infringements on the 2nd Amendment, after they have been implementing them for years. Florida used to be known as the "Gunshine State," but now its Senators are co-sponsoring a national "red flag" law that will result in gun confiscation without due process. Of course, criminals are salivating over the prospect of more unarmed citizens to plunder. As I have said before, use any stimulus money you receive to buy guns and ammo, while you still can.
